PROFESSIONAL SUMMARY

Detail-oriented Information Technology student specializing in Full-Stack development and AI Engineering. Proven ability to build applications using C++, Java, Python, and computer vision frameworks. Experienced in team coordination, technical presentation, and agile task planning. Eager to leverage technical skills and project-building experience in a challenging software engineering or web development internship.

EDUCATION

3rd Year B.Tech in Information Technology

2024 – Expected June 2028

Zeal College of Engineering and Research, Pune, India | Cumulative GPA: 9.35 / 10

12th (Senior Secondary) & 10th (Secondary) Examinations

2024 & 2022

CBSE (Score: 85%) | ICSE (Score: 84%)

TECHNICAL SKILLS

Languages: Java, Python, C++, SQL, HTML5, CSS3, JavaScript (ES6)

Frameworks: Angular, Spring Boot, Bootstrap

Developer Tools: Git, GitHub, VS Code, AI/ML (CNNs), MLOps, OpenCV, MediaPipe

EXPERIENCE

Web Development Intern

Jan 2026 – Present

Apna Coding

- Formulated technical platform recommendations for web architecture, aligning project goals with modern frontend/backend tech.
- Orchestrated daily task scheduling and authored weekly progress reports to maintain alignment on development milestones.
- Audited web applications to identify, document, and resolve critical frontend bugs, improving cross-browser compatibility.

Sales & Marketing Intern

Jun 2025 – Jul 2025

Greenfinch Digital Solution Ltd., Pune, India

- Developed and executed social media campaigns, driving a 20% increase in user engagement over a two-month period.
- Conducted target demographic market research, contributing to a 15% growth in lead generation.

Media Marketing Intern

Aug 2025

Cannibals Media, Pune, India

- Analyzed consumer trends and published optimized reviews on Google Platforms to bolster local SEO rankings.
- Coordinated with content leads to manage publication schedules, ensuring high accuracy and attention to editorial details.

PROJECTS

Flying Cursor: AI-Powered Virtual Mouse

2025

- Engineered a contactless virtual mouse software in Python using OpenCV and MediaPipe to track hand movements in real-time.
- Mapped hand movements to screen coordinates and designed gesture patterns to execute clicks and scrolling.
- Optimized model inference latency to ensure smooth cursor tracking on standard consumer hardware.

AI-Based Internship Recommendation Engine (SIH25034)

2025

- Co-developed an AI-powered recommendation system matching student profiles with relevant tech internship openings.
- Architected the system design and data-flow diagrams, defining skills-to-role mappings.
- Authored technical overview scripts and presented the system demo to Smart India Hackathon evaluation panels.

EXTRACURRICULAR ACTIVITIES

- **Digital Content Lead, Curated Corners:** Managed content strategy and typography guidelines to boost brand visibility.
- **Attendee, AWS User Group Pune (MLOps Meetup):** Completed intensive training on MLOps pipelines and cloud optimization.
- **Attendee, Microsoft 365 Copilot & GenAI Meetup:** Explored LLM integration and prompt engineering techniques.
- **Coordinator, Innoverse Event (2024 – 2025):** Orchestrated logistics and volunteer teams for a college-wide technical event.
- **Independent Publisher:** Authored and published a digital novel, overseeing all writing and self-publishing phases.
